

Dear Partners,

I am Kristie who is on behalf of Taiwan's Organization for Data-driven Application (ODA). This year, there are 12 companies of ODA including Interinfo (Human Resources System), Intumit (SmartRobot Office System), Earthbook (Geography Service), AsiaAnalytics Taiwan (Big Data Applications), etc., expressing their interest in exploring business with overseas companies. Due to COVID-19 condition, we think the online business matching (though Skype or Zoom on one day) may be the first step to start the cross-national cooperation before the exhibition or business visit take place.

In the attached photos please find the complete list and the method we would like to take in the business matching this year. We propose to gather the ODA delegation in one venue in Taipei and have the video teleconference with your companies on one particular date in April or May. The companies from both sides can choose multiple companies they desire to have business meeting with. Each session will last 30 minutes. If further on they find it's a need for face-to-face business discussion, they can come to meet us during Computex in June or Taiwan companies can fly to overseas countries.

Please feel free to pass this information to your local business associations and companies. And let me know if you have any questions. Thank you very much!

Kristie Lee
